

Anita Kapal

Backend and Full Stack Engineer | Applied AI Projects

Bangalore, India | +91 8928235272 | anitakapal25@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Backend and full-stack engineer with 8+ years of experience building APIs and web applications across SaaS, messaging, and business software. Experience with RabbitMQ event-driven architecture, SQL optimization, automated testing, and Symfony hexagonal architecture. Independently built two AI application projects using Python APIs, PostgreSQL, and vector retrieval; both are in testing with early user adoption. Targeting a Forward Deploy Engineer role focused on integration, troubleshooting, and applied AI.

Technical Skills

Languages: Python, PHP, JavaScript, TypeScript, SQL; Java familiarity

Backend and architecture: REST APIs, API integration, FastAPI, Flask, Symfony, Laravel, microservices, RabbitMQ, event-driven architecture, hexagonal architecture

AI applications and data: Generative AI applications, conversational memory, semantic retrieval, ChromaDB, Sentence Transformers, PostgreSQL, MySQL, SQL optimization

Frontend and delivery: React, Vue 3, Docker, Git, AWS fundamentals

Quality and diagnostics: PyTest, PHPUnit, test-driven development, Swagger/OpenAPI, structured logging, authentication, debugging

Selected AI Projects

Artha Personal Finance Agent

[Live demo](#) | React, FastAPI, PostgreSQL

- Independently built a personal finance application for Indian users, integrating a React interface with a Python FastAPI backend and PostgreSQL.
- Kept financial calculations deterministic and traceable, with a conversational layer that explains the available financial evidence in plain language.

RecallGuard Conversational Memory

[GitHub repository](#) | Python, Flask, ChromaDB

- Independently built persistent conversational memory using ChromaDB and Sentence Transformers for semantic storage and retrieval.
- Implemented retrieval, ranking, context-building, and reflection modules exposed through a Flask REST API.
- Added user isolation, authentication, structured logging, and PyTest unit tests to support reliability and testing.

Project status: Both applications are in testing with two early users.

Professional Experience

FullStack Developer | Zitro

Aug 2024 - Present

- Configured RabbitMQ exchanges, queues, and bindings to support event-driven communication within a Symfony-based application.
- Implemented hexagonal architecture to separate core business logic from infrastructure concerns.

Environment: Symfony, Vue 3, PostgreSQL, RabbitMQ, Docker, Git

Backend Engineer | Simplify Workforce Pvt. Ltd.

Jul 2022 - May 2024

- Developed backend functionality for a SaaS platform supporting contingent workforce management.
- Integrated Laravel job queues for background task processing and improved task management.
- Optimized SQL queries and database structures to improve application response times.
- Reviewed code, identified defects, and implemented fixes to improve application stability.

Environment: PHP, Laravel, Python, MySQL

Backend Engineer | Inscript Pvt. Ltd.

Dec 2020 - May 2022

- Developed backend features for CometChat, supporting real-time chat, voice, and video integration.
- Implemented PHPUnit test cases and test-driven development for API modules.
- Created Swagger/OpenAPI documentation to support developer onboarding and API integration.

Environment: Lumen, React, JavaScript, Node.js, MongoDB, MySQL

FullStack Engineer | Veefin Solutions Private Limited

Sep 2017 - Dec 2020

- Built RESTful APIs and web functionality for eStorifi, LEAF, and iSmartServ360 across e-commerce, lending, and service management.
- Developed a CodeIgniter web portal and reusable PHP components using object-oriented design.

Environment: PHP, Laravel, CodeIgniter, MySQL, HTML, CSS, JavaScript, AJAX, jQuery

Education

Master of Computer Applications | Mumbai University

2014 - 2017
